

AUGUSTO VACA

Senior Software Engineer

Quito, Ecuador (GMT -5)
(+593) 0987929783
augustoalejandro95@gmail.com
<https://www.linkedin.com/in/augusto-vaca>

Senior Software Engineer with 6+ years of experience building scalable, high-performance web applications. Specialized in backend and full-stack development using NestJS, Laravel, Django, React, Docker, AWS, MongoDB and SQL Server. Proven ability to lead teams, develop complex systems, and drive business impact. Currently new opportunities to contribute to innovative technology projects.

EDUCATION

University of Manchester
B. Eng. in Computer Systems Engineering
INTO Manchester
International Foundation Year Program.

Manchester, UK
Sept 2016 – Ene 2019
Manchester, UK
Sept 2015 – Jun 2016

EXPERIENCE

Rosaprima - Senior Software Engineer

Jan 2025 - Current

- o **Overhauling the core operations and "Available to Promise" (ATP) logic**, achieving a **96% reduction** in query response times (from 7 min to 16 sec) and streamlining the daily allocation process from 72 to 16 minutes.
- o **Architecting scalable cloud infrastructure and CI/CD pipelines** using Terraform, AWS (SQS, Lambda), and Azure DevOps, successfully reducing deployment cycles from several hours to **under 5 minutes**.
- o **Developing a custom surplus allocation module** based on complex recipe logic while leveraging **AI-assisted tools** (Cursor, Claude Code, Gemini) to maximize inventory utilization and overall engineering productivity.

Tech Stack: NestJS, Django, React, SQL Server, IA tools, Postgres, Docker, AWS, CI/CD, Agile

Totto Ecuador - Romacc, Jr. Technology Coordinator

Jul 2021- Sept 2023

- o Led a team to develop an **attendance registration system**, reducing operational workload by **40%**.
- o Improved the **B2B sales control system** using Django & SQL Server, optimizing stock availability by **20%**.

Tech stack: Laravel, SQLServer, Django, React, SQLServer.

Stupendo, Full Stack Developer

Oct 2019 - Jul 2021

- o Developed a feature allowing users to **access additional services**, leading to a **higher engagement rate**.
- o Unified dashboards for data visualization, **reducing query time by approximately 25%**.
- o Developed a web portfolio for **electronic document submission** with Angular and Laravel, Firebase and Mongo **with a high acceptance rate from clients** from the first day.

Technological stack: Laravel, Angularjs, MongoDB, MySQL, React, SQLServer.

PROJECTS

Sitejabber - Full stack Developer

April 2024 - Oct 2024

- o Developed APIs for automating review request templates, **reducing manual workload by 50%**.

- o Optimized **database queries and caching**, improving API response times.
- o Maintained and enhanced the platform using **CakePHP, MySQL, and Docker**.

Tech Stack: CakePHP, MySQL, Docker, HTML, CSS

LibelulaSoft - Freelance Backend Developer

Oct 2023 - Feb 2024

- o Built the **APIs for the payment** with debit and credit cards. Including the services of create, delete and verify cards, reverse payments, etc..
- o Developed the **backend services for retrieving the information** of the insurances of a client. These services include the information of the client, the insurances, modifying both insurance conditions and payment methods among other services.
- o **Integrated MongoDB-based insurance data** retrieval services, streamlining financial operations.

Tech stack: Laravel, Yii Framework, MongoDB, Postman.

SKILLS

Backend and Api development:

- NestJS, Laravel, Django, Yii Framework
- SQL Server, MongoDB, PostgreSQL
- Microservices, REST APIs, GraphQL

Frontend development:

- React, AngularJS
- TailwindCSS, HTML, CSS

Cloud & DevOps:

- Docker, AWS (ECR, EC2, Lambda) CI/CD, Jenkins, Kubernetes (Basic)

Tools & Methodologies:

- Git, Agile, Jira, Postman, Cursor, Claude Code, Codex, Antigravity
- Power BI, Apache Hadoop (Basic)

Languages: Spanish (Native), English (Advanced), French (Basic).
